The company Correctores Guadalén, S.L. was established in 1978 within the framework of the growing pig and cattle production market in the region of Lorca (Murcia), with a very specialized activity focused on Vitamin-Mineral Premixes for these specific species. In 1980 the name of the company was definitively changed to Lorca Nutrición Animal, S.A.

Nowadays, GUADALÉN NUTRICIÓN is a completely consolidated brand in the market, outstanding and in constant evolution. But GUADALÉN is more than a brand, GUADALÉN is LORNASA, and LORNASA is a committed and dynamic human team, with a clear vocation of service to its customers and with a desire as an objective: to maintain at the highest level the satisfaction of all of them, optimizing its resources and the profitability of its feed, and therefore improving the results obtained year after year.
